

UNDERWATER PUMP AND FLOW-THROUGH CHAMBER FOR THE METS:

To ensure constant flow conditions, an underwater pump Seabird 5M is connected to a flow-through chamber mounted on the METS. A Y-cable connects the pump and the sensor to a CTD. mounting on a frame. A clamp allows mounting on a frame.

Cable, pump and flow-through chamber are available also separately.

The flow-through chamber and the clamp are made of POM.
